GARID
GREATER ACCRA RESILIENT AND INTEGRATED DEVELOPMENT

SCOPING NOTICE

The Government of Ghana (GoG), through the Ministry of Works and Housing, proposes to undertake the sub-project - ''Deferred and Routine Maintenance Dredging of the Odaw Drainage Basin''. The services and works for the Deferred and Routine Maintenance Dredging of the Odaw Drainage Basin will be delivered through the Greater Accra Resilient and Integrated Development (GARID) Project, to be funded by the World Bank, the Netherlands Government and Ghana Government. Dredging will comprise the main Odaw river channel, tributary drains and the Korle Lagoon in the Accra Metropolitan Assembly of the Greater Accra Region.

Newly dredged material from the main Odaw drainage channel, tributary drains and the Korle Lagoon would be handled safely and ultimately hauled away from the dredging sites to designated final disposal sites in order to create an obstruction-free work environment and to prevent washing back of the material into the Channel.

The project has identified a site at Anyaa in the Ga Central Municipality to be developed into a final disposal site to receive newly dredged and handled material. The site is estimated to have the capacity to receive about 3,049,351.7 m^3 of dredged material.

Notice of the proposed disposal and management of the dredged material at the proposed disposal site is hereby served for public information as required under the procedure for the conduct of Environmental Impact Assessment (EIA) in accordance with Regulation 15(1) of Environmental Assessment Regulations, 1999 (LI 1652).

Any person(s) who has an interest, concern or special knowledge relating to potential environmental effects of the proposed undertaking, may contact or send such concerns to:
